1 Adding a Book

To add a new book to your library, click the button labeled *Add*. Doing so will open the Add Window. Within the said window, you can create a new book by entering its information to their respective places e.g. the title of the book to the text field labeled *Enter Text*.

Exceptions include : Author(s), Tag(s), Translator(s), Date, Cover image. For the values "Author(s), Tag(s), Translator(s); simply enter the information to the text field and press the button labeled *Add*. To remove info from these values, select the unwanted value and press the button labeled *Delete*. For selecting a date, press the calendar button and choose the correct date. For uploading a cover image, press the *Load Image* button and choose the cover image or drag and drop the image onto the page.

To delete the cover image, simply press *Delete Image*.

2 Editing a Book

To edit a book from your library, select the book and then press the *Edit* button. The Edit Window will be opened which is similar to the Add window but with the info of the book already entered in. From there you can edit the book to your desire.

3 Deleting a Book

To delete a book from your library, select the book and then press the *Delete* button. Doing so will remove the book from your library.

4   Saving Changes

To save the new information that your library now has, you must press the *Save Changes* button. Doing so will save all of the added or deleted information in your library for future use.

5   Importing and Exporting Json Files

To import or export files, press the buttons *Import*, *Export* doing so will open up the file explorer for you to choose a Json file to import or export.

6   Searching a Book

To search a book, click on the text field labeled as *Search* and then put in any one of the books searchable information. These values are all but the tag values.

7   Filtering the library by Tags

To filter the library by using tags, press the button *Tags* which will open a new window for you to select the tags that you want the book to have.

8   Displaying various information

To only display the info that you want, press the "+" button which will show all the displayable variables that the book has. From there you can edit the criteria.
